Gnostice eDocEngine VCL is a simple to use library, designed to help you integrate document creation function in Delphi and C++ Builder. The tool also allows you to generate various types of interfaces for your reporting functions, to make it easy for you to export data as PDF, with customizable options. Gnostice eDocEngine VCL can create several document types, such as PDF, RTF, HTML, XHTML, EXCEL, TEXT, CSV, Quattro Pro, LOTUS 1-2-3, DIF, SYLK, TIFF, PNG, SVG (XML based vector graphics), JPEG, GIF, BMP, EMF and WMF formats. Metafile, BMP, DIF, SYLK and Text can be directly output to the Windows Clipboard. The tool is compatible with various editions of the two development environments, Delphi and C++ Builder, plus it works with both 32-bit and 64-bit architectures. You can even manually create the interface for the document exporting function, by selecting one or several on the available options. Therefore, you need first to select the IDE version you wish to work with, then choose the preferred report generating tool. You may thus associate your component with other environments, such as Report Builder, Quick Report, ACE Reporter and several others. The document exporting functions also feature graphic interfaces, which allow you to quickly make the desired changes in a visual environment. You can select the number of pages you wish to export, turn images into separate pages, activate or deactivate hyperlinks. Password encryption, for each file is supported, using the 128-bit or 256-bit algorithms and establishing restrictions: copying, modifications, printing, annotations, accessibility. The tool also supports setting the page layout in each PDF: single page, one or two columns and preferred page mode. Additionally, it can insert page transition effects, such as blinds, box inward or outward, page wipe, dissolve or glitter style. Gnostice eDocEngine VCL supports multi-platform development, Windows, iOS, Android, Windows Phone, OS X and iOS (iPhone/iPad/iPod). You can create a .NET implementation, plus a COM version. It may even be embedded in a third party program. Gnostice eDocEngine VCL is a stand-alone component, that can be used in several languages, including Delphi, C
