The CRJ Series include the CRJ700, CRJ900 and CRJ1000. The CRJ NextGen family of products are supported by an extensive suite of CRJ NextGen Training and information products. Main differences from the older CRJ NextGen series: Wingspan of CRJ700 has been reduced by using composite material Rear fuselage section extended and airbrake replaced by a full belly door, typical of recent CRJs Tail height of CRJ900 and CRJ1000 has been reduced by using composite material The height of CRJ1000 has been reduced Knees have been redesigned to a more traditional appearance Installation of a rear wing to CRJ900 and CRJ1000.
